EDUCATIONAL GUIDE & ABSTRACTS

Commercial Support

This educational activity is supported by Educational Grant from Saluda and In Kind Grant from Nevro.

Intended Audience

This meeting will bring together 250 pain physicians from New York, New Jersey and the surrounding states. We also will include fellows and residents and expect to be able to draw significant interest from the medical trainees in nearby medical schools. Physicians assistants, nurses and nurse practitioners are also included as important parts of first class pain patient care.

Learning Objectives

As a result of participation in this activity, learners will be better able to:

1. Utilize best practices in the assessment, diagnosis, treatment and management of patients with pain
2. Recognize and evaluate presentation of pain, description of pain, and pain markers
3. Properly incorporate the best available such as ASIPP guidelines and CDC Guidelines, for Prescribing Opiate Medication for Chronic Pain, safely and effectively
4. Differentiate between abuse deterrent technologies to counteract opioid crisis, and protect community at large, protect patients and protect individual practice
5. Understand the minimally invasive cutting edge therapy options to reduce the need for extensive sacroiliac fusion surgery
6. Evaluate and offer appropriate in-office treatment options for vertebral fractures
7. Ability to assess cutting edge advances in neuromodulation therapies, and select the best for their patients, that is safe and highly effective
8. Update billing practices where ICD-10 coding has changed with respect to interventional pain management
9. Evaluate and assess the MIST guidelines and treatment algorithm to decide the best minimally invasive options for lumbar spinal stenosis
10. Prepare or make necessary changes in preparation for MIPS and MACRA, as they relate to potential impacts for my practice and ability to effectively treat chronic pain patients
11. Evaluate advanced cellular and acellular regenerative medicine modalities and techniques
12. Incorporate appropriate regenerative medicine modalities and/or techniques for the treatment of chronic pain

Statement of Need

It is important for the experts in the field to share the most current information and data available to assist physicians in selecting the right patients and right therapies to improve patient outcomes.

The goal of the NY/NJ Pain Management Symposium as a CME Conference is to provide a unique and dynamic program on the most up to date, cutting edge information on therapies available to treat patients in pain. Each faculty member is a recognized leader in the field.

Information and data presented will be on label and present the most recent and relevant information available with a focus on improving patient care, access to therapies, and overall outcomes. Format will include individual lectures, and panel discussions as well as practical workshops, hands-on practice either on live models or cadavers.

Accreditation Statement(s)

In support of improving patient care, this activity has been planned and implemented by Dannemiller and NY/NJ Pain Symposia.
